Re: Third Street Improvements:

The City of Washington has contracted with us to re-pave Third Street, from Jefferson Street to Highway 47. As part of the project, we will be removing and replacing all sidewalks and driveway approaches. This letter is to inform you that **Monday April 1st**, we will begin removing the old concrete in preparation for the new installation. As we dig through the driveway approaches, we will rock them in temporarily for access, and within the next few days they will be formed and poured, usually in a single day, and channelizers will be placed in front of them temporarily. Curing will take approximately three days, then channelizers will be removed.

The first phase we will be working on will be between Jefferson and Burnside. *Please do not park on Third Street between these streets.* There will be construction signs in place to direct motorists.

If you have disabilities or special needs that need to be accommodated, please let us know. Thank you in advance for your patience and cooperation.

Mark Huber- Project Manager
